

CUTTER & BUCK 2012 ONSTOCK COLLECTION

Redefining the Flag.

As from Spring 2012, we launch our new logo. We still fly the flag but in a more graphic and forceful manner. The Iconic logo will be flown from all new garments and on all new displays.

In the Onstock Collection presented in this print, the Classic Logo still appears on garments that are carried over from previous season, whereas the Iconic logo is used on new garments and new styles/colours of existing items.

For your convenience, we have carefully marked what logo appears on what garment to avoid unwanted mixing.

Christian “Kricken” Härdin and Johan Andersson are PGA golf pros at the well-renowned Barsebäck Golf & Country Club, and they are almost equally legendary after many years of training both elite and amateurs at their Golf Academy next to the strait of Öresund, which divides Denmark and Sweden. Their activities stretch outside Sweden and during their many golf trips to USA they got familiar with Cutter & Buck. Today Cutter & Buck Onstock garments make out the foundation of the Barsebäck Golf Academy's profile collection, since they are particular about their clothes being both comfortable and functional, with a faible for the classic golf fashion.

OUTPLAY THE ELEMENTS

Every piece of our sportswear is the fruition of years of rigorous research and development. Cutter & Buck's CB ProTec collection is a family of performance wear born of function, refined with intelligence and the latest in innovative technology. This collection includes performance categories such as Cutter & Buck's CB DryTec™, CB WeatherTec™.

CB DRYTEC™

Cutter & Buck CB DryTec™ and CB DryTec™ Luxe offers advanced moisture management to keep you dry, comfortable and looking your best. CB DryTec™ is lightweight, quick-drying and naturally wicks moisture away from your skin, keeping you cool and comfortable all day long.

CB WINDTEC™

Our outerwear products keeps you dry and comfortable whatever the forecast, and its light weight won't interfere with your golf swing.

CB WEATHERTEC™

Cutter & Buck CB WeatherTec™ is state-of-the-art protection from the wind and rain. It is lightweight, allows full range motion, and keeps you dry and comfortable. Count on CB WeatherTec™, whatever the forecast. The materials are the fruitions of years of research and development.

PIMA COTTON

Some of our best products are developed with "PIMA cotton", which we are very proud of.

Our search after the best cotton, which should also fulfill our high requirements of environmental friendliness and high ethics, took us to southern Peru and the Canete valley. The soil and the special climate in the highlands here, creates unique possibilities to grow cotton of absolutely world class. The PIMA cotton or the so called White Cotton is recognized by the fact that it is stronger and more white than ordinary cotton. PIMA cotton is much more expensive than ordinary cotton, which mainly is the result of a very caring process of hard work for about nine months from planting the seed to harvesting.

VENT AIR®

The material is wind and water repellent and keeps the body dry and cool. The body's excess heat will be transported away through the three-component high-tec fabric. All garment have taped seams.

Cutter & Buck bring a fresh Pacific Northwest perspective to the American spirit of golf & leisure. By mixing the progressive with nostalgic, the technical with casual and style with performance, we not only have our own interpretation of the game, but also a unique design of clothing that makes you look great on and off the course.

You are more than welcome to join us. No brand covers your needs better in your daily life!
