DREAM AND DISCOVER

Dreams and goals make life so much more meaningful and exciting, whether they have to do with the small everyday things or major important business or private life decisions. They set curiosity and forces in motion that often takes us on journeys of discovery we only dare to dream about.

D.A.D. garments are not exclusively for professional sailors. We develop and design functional high-quality clothing with a maritime touch and strengthen ambitious companies' profiles. We believe in professionalism and personal meetings. Our goal is to be the best business partner with the best brand once you have decided to raise your own brand to new levels and start your journey.

That's why we call our brand D.A.D., "Dream & Discover".

THE RACE IS ON!

Continued development is natural to us. Our products are the core of D.A.D. Sportswear. Therefore, we collaborate with famous Swedish sailing personalities to continue our development and produce the very best quality, comfort and performance promo wear. In our language we say *The race is on!*

FARR65r
SAILING • RACING • CRUISING

Adventure sailor Bengt Tarre is the skipper of the 65 feet long Celeste of Solent (Farr65r), our model for this catalogue. Several times per year, Bengt takes his crew on rough voyages all over the world. Bengt holds a Master of Yacht Unlimited and is also a certified Master of Yacht Instructor. When he's not a sea, he works as a boating and business lawyer.

Anders Nordström is the skipper for Team UK Syversen. Together with his team, he does both offshore and inshore yacht racing. Anders and his team have won the Round Gotland Race twice, the Göteborg Offshore Race and they are two-time Nordic Champions as well as Swedish Champions in several different classes. Anders has worked as a sailmaker for more than 25 years. Furthermore, he is part owner of UK Syversen, Sweden's leading sailmakers.

We are privileged to have Bengt Tarre, Anders Nordström on our D.A.D.-team and we wish them the best of luck with the upcoming season!

NORWAY

SAILING AND SKIING

EVERY YEAR DURING THE MONTH OF JULY, CELESTE SAILS TO NORWAY. WHETHER YOU'RE AN EXPERIENCED SAILOR OR A BEGINNER, YOU HAVE THE OPPORTUNITY TO COME ALONG ON THIS ADVENTURE. BENGT TARRE, CELESTE'S SKIPPER, TALKS A BIT ABOUT THE TRIP CALLED SAILING AND SKIING, AN EXPERIENCE OFFERING THE BEST OF TWO WORLDS

WHY CHOSE WHEN YOU CAN GO both sailing and skiing? For those looking for an adventure, there's the opportunity to go sailing to the Norwegian fjords for some fantastic summer skiing at the Folgefonna Glacier in June. The 14-person team sails Celeste, a Farr 65 r, from Långedrag to Norway and Jondal in the Hardanger Fjord, a distance of about 300 nautical miles. The trip lasts for nine days, of which six are spent sailing and the remaining three skiing and doing other things – for example climbing the magnificent Prekestolen.

The trip, which you can make regardless of sailing experience, begins with a thorough run-through of Celeste. It's important that everyone feels secure on the boat and confident to be part of a watch team. Departure is from Långedrag for a few days of sailing on Skagerrak and the North Sea. We pass by the Skagen lighthouse and reach the Norwegian south coast the next day. We pass the notorious area at Lindesnes, between Kristiansand and Lista, where we often encounter rough weather. This is when the real sailors feel right at home!

We continue gliding along the Norwegian west coast and pretty soon we'll be able to see the high mountains. If the weather is too rough, we'll enter a harbour to catch our breaths. Early next morning we head for the Hardanger Fjord and Jondal. From the fjord you will see a fairyland – a guaranteed memory for life. We land just below the high snow-capped mountains, not far from the glacier.

We have set aside about 2 days for skiing in a fantastic environment where sea meets mountains. There is guaranteed to be snow and wonderful Nordic light evenings and nights. Celeste will be moored close to the glacier and the ski centre where you will experience wonderful summer skiing. It only takes 15-

20 minutes by bus from Jondal to Folgefonna as the area is called. Skis and ski boots can be rented on location for those who haven't brought their own equipment. There are of course other things to do besides skiing, like hiking the fantastic trails or other nature activities. We live on the boat and round off our days by going for a swim in the fjord. After all, it is adventure sailing!

After two incomparable days skiing, we enter the scenic Lyse Fjord to magnificent Prekestolen. Those willing and able are given the opportunity to climb this well-known steep cliff. On our way home, we sail through the nice Norwegian archipelago and then out on the North Sea. Before we reach Långedrag, we usually have time for a last stop at Skagen to round off the adventure. The trip is a unique once in a lifetime experience.

OTHER

It's important to remember that sailing is something we do on nature's terms. We always take the crew's health and skills into consideration. Sailing at sea can be very demanding in rough weather. Safety always comes first. In other words, the weather decides. Are you interested? Visit Celeste's homepage www.farr65r.com or go to her blog www.farr65r.blogspot.com for more information.

THE YACHT

Farr 65 r Celeste is a delightful cruising and racing yacht with all conceivable safety, comfort and navigation equipment. She is registered in the British ships register with the highest safety rating and is approved to carry 16 people on an ocean passage. She is always crewed by internationally certified skippers with a captain's license for smaller commercial vessels (Master of Yachts).

DESIGN PROCESS

The D.A.D brand is intended for users looking for innovative and reliable products. Therefore, nothing is as important to us as the quality of our clothes. We want our clothes to stem from an environmentally friendly manufacturing process and deliver the required technical solutions. We renounce child labour and emphasize that factory workers must work under good conditions, thereby taking our responsibility for environmental and work safety issues. The customer's experience of our products should be high-quality products with functional details.

We are one with the product during our design process. We want to touch the materials, design the garments according to the materials' best qualities, thereby obtaining perfect garments. This is the only way we can offer our customers the right products at the right price. Well, how do we know we have the right products? Because we always test our products in tough conditions and real-life situations. Then we can experience our designs' pros and cons before we go into production.

Our products should have a maritime touch and strengthen ambitious companies' and organisations' profiles. We believe in professionalism and personal meetings. We help our customers who dream of discovering the world and aim beyond the horizon. We develop and design functional high-quality clothing for them so that they can realize their dreams. Hence the name D.A.D, *Dream and Discover*.

CORPORATE SOCIAL RESPONSIBILITY

It is important to us that the suppliers we use follow local legislations and respect the fundamental rights of the workers. While we are aware of the different legal and cultural conditions under which factories operate all around the world, we have defined certain basic requirements that all suppliers should follow. We will then work closely with our suppliers towards continuous improvements. By letting our quality controllers and our SER staff be regularly present in the factories, the visibility to the factories increases and thus a more efficient monitoring system for any social and environmental issues that may be identified.

New Wave Group is a member of Business Social Compliance Initiative (BSCI), an initiative for social citizenship led by the Foreign Trade Association (FTA). BSCI is a cross-sector initiative and today has more than 700 member companies and prescribes a common audit methodology and code of conduct that is based on UN conventions on human rights, convention of children's rights as well as the ILO conventions.

The code statutes requirements on suppliers in risk countries regarding:

- Prohibition against child labour, forced labour and discrimination.
- Health and safety.
- Freedom of association and collective bargaining.
- Wages, compensation and benefits.
- Fundamental environmental and management systems.

We recognize how closely connected our business activities are to local and global environmental issues. We also understand how environmentally sustainable solutions may, in addition to preserve our planet, also lead to better results in our business. To this end we are constantly trying to develop sustainable solutions in areas such as transport, office environments, packaging, chemical use and "greener" production.

BREATHABLE

This is a material that both breathes and releases moisture. A soft and flexible material that can be washed many times without losing its shape and function.

COOLDRY / COOLTOUCH

This is a material that both breathes and releases moisture. Cooldry also stands out because of its quick-drying nature, ensuring a feeling of freshness even during physical exertion.

SOFTSHELL

Softshell is a modern material that provides optimal freedom of movement. The material is wind and waterproof with good breathability. Softshell is a soft and stretchable 3-layer laminate, a material that dries very rapidly.

WIND- / WATER REPELLENT & BREATHABLE

By applying this method, a windproof with a water repellent surface is obtained. This can be done chemically or through weaving technologies in the material.

3M THINSULATE

3M™ Thinsulate™ insulation helps keep you warm when it's cold outside. The microfibers that make up Thinsulate insulation work by trapping air molecules between you and the outside. The more air a material traps in a given space, the better it insulates you from the cold outside air. Because the fibers in Thinsulate insulation are finer than the fibers used in most other synthetic or natural insulation, they trap more air in less space, which makes Thinsulate insulation a better insulator.

WIND- / WATERPROOF & BREATHABLE

These three functions are found in most outer garments, which have a special coating or membran on the inside of the outermost layer that stops water and wind while allowing the material to breath.

32 DEGREES

Garment made of PCM, Phase Change Material. Due to the unique microcapsules in the fabric construction a 32 C temperature can be obtained inside the garment no matter the outside temperature.
