

**STORMTECH**  
**SPRING/SUMMER 2014**

# INNOVATING FOR BETTER COMFORT.

STORMTECH outerwear is field-tested for performance in a wide range of climates and weather conditions, making it easy for you to find a jacket to fit your adventure.

**CLIMATE RANGE**

**WARM**

+15°C TO +30°C  
59°F TO 86°F

**CLIMATE RANGE**

**MILD**

0°C TO +15°C  
32°F TO 59°F

**CLIMATE RANGE**

**COLD**

0°C TO -15°C  
32°F TO 5°F

**CLIMATE RANGE**

**EXTREME COLD**

-15°C TO -35°C  
5°F TO -31°F

Our waterproof/breathable coating and laminating process allows water vapor from perspiration to exit while preventing additional moisture from the elements to enter; this ensures the garment remains both warm and dry inside. The higher the waterproof rating, the more precipitation the fabric can block from crossing into the barrier; thus keeping you drier for longer. The higher the moisture vapor transport rating, the more efficiently perspiration can pass through the fabric to exit outside, which keeps you cooler for longer. Here is a summary of our ratings:

**STORMTECH**  
PERFORMANCE

## QUALITY GUARANTEED.

STORMTECH Performance Apparel has been successfully conquering the challenges of extreme and unpredictable climates since 1977. Careful thought and planning goes into designing every product we make. Performance fabrics and features are combined with excellent workmanship, which result in quality garments that are highly functional and fashionable.

All products are fully warrantied to the original owner against defects in materials and workmanship for 3 years. If a product fails during that time due to a manufacturing defect, even after extensive use, we will repair the product, without charge, or replace it, at our discretion.

This warranty does not cover repairs made or attempted by third parties, damage caused by accident, improper care, negligence, normal wear and tear, the natural breakdown of s and materials over time and use, and all decoration techniques applied to the product.

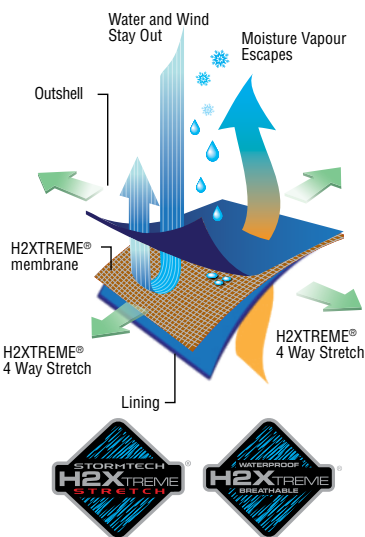

Congratulations! You've chosen a quality product you can count on.

# STORMTECH®

## PERFORMANCE TECHNOLOGY

### H2XTREME® Waterproof / breathable

The ultimate in waterproof/ breathable technology developed by STORMTECH, all H2XTREME® products deliver a minimum waterproof and breathable rating of 5,000mm/5,000g/m<sup>2</sup>/24hr leaving you warm and dry no matter how extreme the climate.

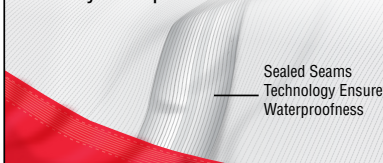

### H2X® Waterproof / breathable

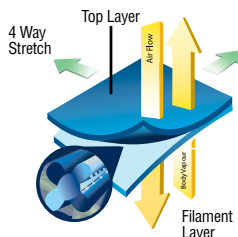

Developed by STORMTECH, these fabric coatings are designed to provide wet weather protection at a minimum rating 2,000mm/1,000g/m<sup>2</sup>/24hr.

To ensure absolute waterproofness, STORMTECH products rely on Sealed Seams technology, because if a garment is not fully seam sealed, it is not fully waterproof.

H2X-DRY® fabrics provide permanent moisture-management technology engineered into the yarn, wicking moisture away from the skin and promoting healthy muscle maintenance.

High efficiency/high loft synthetic alternative to down, designed to maintain its thermal properties under extreme conditions. STORMTECH thermal fill is highly efficient, lightweight and compressible, providing superior resistance and reliability in cold conditions.

STORMTECH D/W/R technology offers a waterproof coating that provides lasting water-resistant protection when you are at your most active.

### STORMTECH WATERPROOF

These fabrics are heavily coated (over 50% by weight) with PVC to provide a completely waterproof and highly durable fabric for extreme conditions.

### Teflon®

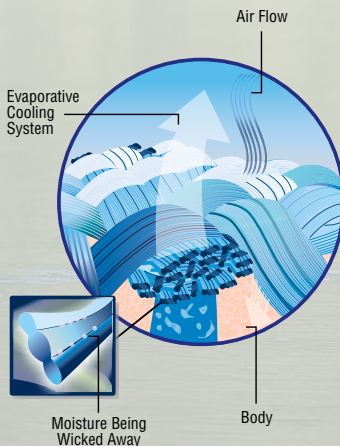

Fabrics treated with Teflon® repellency fight off dry soil and spills, and provide highly effective and long-lasting water-repellent protection.

COOLMAX® Extreme Performance fabric is the original, non-chemically treated performance technology that provides incredible moisture wicking capabilities that make for a more enjoyable workout.

COOLMAX®freshFX offers superior moisture-wicking technology with enhanced protection capabilities that eliminate odour causing bacteria and provide long lasting freshness.

Fabrics are engineered with built-in sun protection that will not wear off.

Fabric is engineered to resist snagging.

# PRODUCTION LABOUR STANDARDS

STORMTECH strives to provide durable, high-quality products to our customers in a way that respects the health, safety and dignity of the workers who make our products. As a global company, STORMTECH supports best practices at the factory level, and is committed to working with factories that are WRAP and BSCI certified.

WRAP is an independent, non-profit organization dedicated to the certification of lawful, humane, and ethical manufacturing throughout the world.  
[www.wrapapparel.org](http://www.wrapapparel.org)

The Business Social Compliance Initiative is a leading business-driven initiative for companies committed to improving working conditions in the global supply chain.  
[www.bsci-intl.org](http://www.bsci-intl.org)

# CUSTOM DESIGN

STORMTECH is pleased to offer our leading-edge design capabilities to develop customized products tailored to meet specific requests.

## IN-HOUSE DESIGN TEAM

Our highly experienced team of designers has the ability to offer uniqueness by allowing the option to design completely personalized STORMTECH products.

## DESIGN MODIFICATION

Redesign to add, remove or alter product details on inline styles to accommodate specific requirements.

## OFFSHORE ATTRIBUTION

We have the ability to offer exceptional pricing on products featuring custom logos with our offshore attribution program, including embroidery, screen print, heat transfer, debossing and other leading-edge decorating techniques.

## CUSTOM COLOUR

Match your specific colour requests to any one of our STORMTECH fabrics or accessories.

# STORMTECH

## INSPIRED DECORATING OPTIONS

Work with our team today to execute your logo in an innovative way, using STORMTECH's leading-edge decorating techniques.

### EMBROIDERY

High density decorative stitching on fabric that evolved from handwork to today's high-speed, computerized multi-head machines. With state of the art embroidery equipment, thread and digitizing software, STORMTECH can embroider artwork and logos onto a wide range of apparel products (f)

### SCREEN PRINTING

A printing technique that uses a woven mesh to support an ink-blocking stencil. Nylon inks are used for fabrics with a high nylon content or stretch factor (such as polyester and lycra). Plastisol inks are used on all cotton rich products. It's the ideal decoration for a variety of fabrics and large format applications, at a low cost (f)

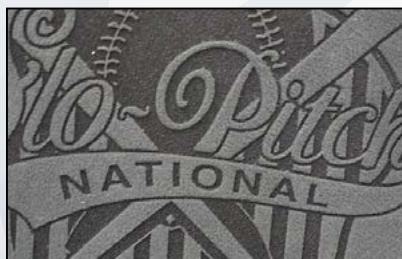

### DIGITAL HEAT TRANSFER

The process of transferring images to a large variety of products without inks or screens is possible with heat transfer application technology. Perfect for waterproof fabrics, STORMTECH's heat transfer process supports extreme detail and is designed for logos with many colours (f)

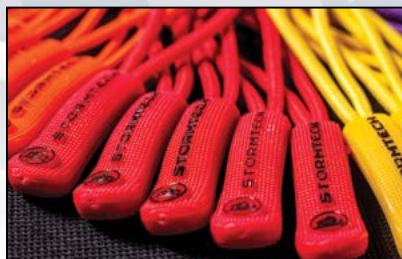

### RAISED SILICONE HEAT TRANSFER

A die-cut mold is used to create a high definition, durable, multicolour, raised silicone 3D transfer that can be applied to essentially any fabric. The 3D texture creates a high-quality, premium look to your logo or design (f)

### LASER ETCHING

This next generation tone-on-tone decoration technique uses a high energy beam of light to etch into fabrics while moving across a pre-determined course. This technique is ideal for etching extremely precise and intricate details into synthetic fabrics such as fleece (f)

### CUSTOM TRIM

Special colour options available in zipper pullers and other special order trim options allow you to colour coordinate with decorating applications. This is an excellent option to further enhance and customize your product to your brand's colours (f)
